

# Philip Henning

## Junior Full Stack Software Developer

I'm an experienced Business Analyst who is now moving fully into software development. A significant change in my circumstances led me to refocus my career, and I've committed to building on the technical foundations I've had for many years.

My interest in software development began during my academic studies and has remained a consistent thread throughout my career. That long-standing foundation now supports my continued growth as a full-stack developer.

My technical skills span a range of languages and frameworks, including C#, PHP, JavaScript, React, Next.js, HTML and CSS. I also have experience with various database systems and tools, including MySQL, phpMyAdmin, MS SQL, SSMS, PostgreSQL, and Supabase.

### HISTORY & EXPERIENCE

- ❖ 2024.01 - Current – Health-related career break
- ❖ 2023.06 - 2023.11 – Technical Business Analyst (Yara)
- ❖ 2023.05 - 2023.06 – Business Analyst (KCOM)
- ❖ 2022.10 - 2023.01 – Business Analyst (Ligentia)
- ❖ 2018.07 - 2022.10 – Systems & Business Analyst (DFDS)
- ❖ 2016.08 - 2018.06 – Commercial Business Analyst (Yara)
- ❖ 2011.05 - 2013.02 – UK CRM Coordinator (BSN Medical)
- ❖ 2009.09 - 2011.05 – Commercial Operations Coordinator (BSN Medical)

### MOST RELEVANT ROLE

*Systems & Business Analyst – DFDS UK.*

A member of a multidisciplinary, self-organizing SCRUM team that produced bespoke software solutions for shipping operations. Responsible for strategic and tactical decision-making within a specific workstream, including backlog management, stakeholder management, software release planning, requirements elicitation, and the production of written artifacts (e.g. user stories).

### MOST RECENT ROLE

Currently on a career break due to a health-related diagnosis. However, prior to this, as a Technical Business Analyst, tasked with understanding a decades old, standalone business area, and documenting the 'as-is' processes ahead of a rebuild within a micro-services environment.

### EDUCATION

- ❖ MSc - Information, Systems and Technology  
- City, University of London  
- 2015  
- Merit
- ❖ BSc - Business Computing and E-Commerce Systems  
- Leeds Beckett University  
- 2008  
- 2:1

### QUALITIES

### SKILLS

#### Coding Tools

- Visual Studio
- GIT & Github
- Sublime Text
- Command Line (CMD)
- StackOverflow

## CODING SKILLS & EXPERIENCE

### Languages / Environments / Technologies

- C#
- .Net
- OOP (Object Oriented Programming)
- Entity Framework
- WPF
- MVVM (Model – View – View Model, pattern)
- MVC (Model – View – Controller, pattern)
- API creation (using Node.js)
- Working with APIs
- PHP
- Next.js
- React
- JavaScript
- HTML
- CSS

Many different projects that showcase some of the languages and technologies listed above can be found here:

<https://main.philhenning.online/projects>.

Some of these were 'end of term assignments', while some were 'proof of concepts' for actual businesses, and others were simply an excuse for 'dabbling and learning'.

### Communication Tools

- Teams
- Slack
- Discord

### Project Tools

- Azure Boards
- Jira
- Trello
- Miro

### Agile Practices

- SCRUM
- Kanban
- Variations e.g. SCRUMBAN
- SAFE

### Databases & Tools

- SQL Server Management Studio
- MSSQL
- MySQL
- PostgreSQL
- phpMyAdmin
- Supabase
